

REMARKS

Claim remarks for claims as amended

Applicant has amended the pending independent claims to include the limitation “a camera mount coupled with said first camera and said second camera wherein said camera mount is at a fixed rotation of a first axial angle with between 0 and 90 degrees about a roll axis defined as parallel to ground”. Support for this addition is found in Figure 1B, Figure 2, step 201, Figure 5, Figure 8 and at least paragraphs [0013] “With the camera centers angled about the roll axis, horizontal and vertical lines in the environment appear as angled lines in images taken from the cameras enabling more accurate distance calculations”, [0015] “In one embodiment, the cameras are mounted parallel to the ground, but are rotated 36.9 degrees from horizontal.”, likewise [0016] and [0017] show other fixed rotation angles.

CONCLUSION

As all points concerning the cited references have been addressed by Applicant, Applicant respectfully submits that the claims are in condition for allowance.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "Joseph J. Mayo".
